Linkedin: <https://www.linkedin.com/in/hemant-kumar-3a010b141>

Professional Summary

Frontend Developer with 6+ years of experience building dynamic web applications using React, Redux, JavaScript, and TypeScript.

Skilled in migrating monolithic application to micro-frontend architecture and developing scalable, reusable UI components.

Strong understanding of React internals and performance optimization techniques.

Experienced in Agile/Scrum, with a focus on timely delivery and cross-team collaboration.

Portfolio

<https://hemantkumar-frontend-portfolio.web.app>

Technical Skills

Languages: JavaScript, TypeScript, HTML5, CSS3

Frameworks/Libraries: React JS, Next JS, Redux, Axios

UI Libraries: Material UI, Semantic UI, Styled Components

Version Control: Git, GitHub, GitLab

Tools & Practices: Agile/Scrum, REST APIs, Microfrontend Architecture, Storybook

Testing: Jest, React Testing Library

Work History

Specialist Software Engineer, LTIMindtree

Sep 2024 - Current

Project: GE Healthcare

Bengaluru

- Migrated a legacy monolithic application to a scalable micro-frontend architecture, improving modularity and deployment flexibility.
- Developed and maintained reusable, responsive UI components using React, TypeScript, and Material UI based on Figma designs provided by the client.
- Integrated Redux for efficient global state management, ensuring consistency across micro frontend while maintaining performance.
- Improved frontend performance by 20% and reduced production bugs by optimizing component structure
- Worked closely with cross-functional teams, including designers, backend developers, and QA, to ensure seamless feature delivery aligned with business goals.
- Adhered to best practices in accessibility, performance optimization, and component testing, contributing to high code quality and compliance standards.

Senior Software Engineer, Nous Infosystems

Nov 2022 - Jul 2024

Project: Royal Bank of Canada, RBC

Bengaluru

- RBC is a front-end banking web application that allows users to perform all transactions and provides access to all banking information users need.
- Translated functional requirements into clean, modular, and scalable code and followed industry

best practices and coding standards.

- Increased codebase quality by restructuring components and integrating thorough test coverage with modern testing tools.
- Conducted thorough code reviews and validations to maintain code quality, consistency, and performance standards across the team.
- Adhered to best practices in accessibility, performance optimization, and component testing, contributed to high code quality and compliance standards.
- Mentored peers by assisting in debugging, task completion, and knowledge sharing, enhanced team productivity and on-time project delivery.

Associate Consultant, Capgemini

Jul 2021 - Nov 2022

Project: Discover Bank

Bangalore

- This is a banking initiative aimed at managing credit card fraud. Customers of Discover Bank utilize this web application to address issues related to fraudulent activities concerning their credit cards.
- As a Front End Developer actively participated in the development of innovative features from design to execution.
- Participated in daily sync up call with team for application and code walkthrough.
- Utilized Redux for state management, ensured a consistent and predictable application state.
- Worked alongside backend teams to implement seamless integration of front-end components with APIs.
- Proactively identified and resolved critical bugs and performance issues, reduced turnaround time and enhancing application stability in production.
- Guided other team members in finished their tasks on deadline.

Project Engineer

Feb 2019 - Jul 2021

Wipro Ltd.

Bangalore

- Developed and maintained user interfaces using React, gained proficiency in the framework's core concepts such as components, state, and props.
- Gained experience in debugging and troubleshooting, identifying and resolving issues to ensure the smooth functioning of applications.
- Collaborated with backend developers to integrate front-end components with RESTful APIs.
- Participated in building responsive and user-friendly web applications, ensured a seamless user experience.

Education

Bachelor of Technology: Information Technology

May 2018

Hindustan College of Science And Technology

Mathura
